BREAKING DOWN WALLS: THE CONFLUENCE OF SECURITY, PRIVACY AND LAW

Privacy and security have been alternately described as being at odds with one another and as being complementary. Historically, achieving the confidentiality and integrity of data has been the purview of the information security and IT teams, although the increasing prominence of privacy policy and legal risk are challenging that. Should these disciplines maintain their separation? Would that be possible or desirable? Don't both disciplines, in the end, serve the goal of business risk?

TECHNICAL AND LEGAL CHALLENGES TO HEALTH INFORMATION EXCHANGE

Health Information Exchange is moving forward, stimulated by billions of federal dollars and the specter of penalties for failure to engage. There is a gap between available technology and the laws regulating privacy and security of health information. The panel will discuss the effect of this disconnect and the potential for resolving the challenges confronting health information exchange.
